CONTINUOUS FASTENING SYSTEM FOR STRONG, MAINTENANCE-FREE NEW EAVESTROUGHS

[www.alu-rex.com](http://www.alu-rex.com)

## Made from aluminum

- » Does not rust
- » Keeps its shape
- » 25-year warranty

## Roll-Back™ technology

- » Efficiently returns water to center of Fixa-Tech

## Continuous hanger

- » Provides uniform support across the entire length of eavestrough
- » Makes eavestrough 50% stronger

## Fixa-Tech<sup>®</sup>

- » Extends eavestrough life
- » Enhances strength to withstand falling snow and ice from roof
- » Maintains eavestrough shape under ladder weight
- » Installs on most 5" and 6" eavestroughs
- » Invisible from the ground
- » 15 km/h wind will blow away most debris

## Installer accessories

- » Prefab adjustable inside and outside corners for quick installation
- » Water diverter

## Alu-Perf™ perforations

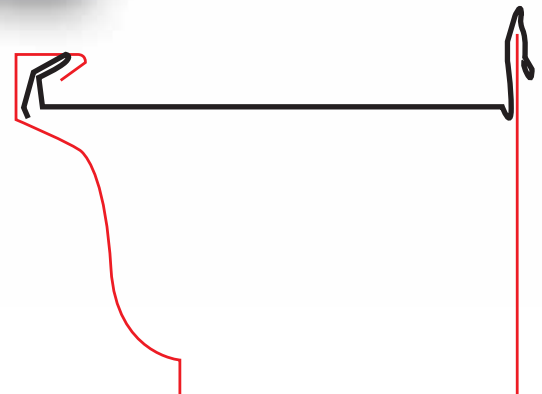

- » The perfect balance between maximum drainage and protection against debris
- » Size: 7/64" (2.8 mm)
- » Drain 29.7" (754 mm) of water per hour

## Continuous snap-on rear

- » Tightly seals eavestrough against leaves and debris

## Hex head screws

- » Reduce risk of fascia board rot
- » Include gasket seal
- » Galvanized
- » Attach every 18" on asphalt shingle roofs, 12" on steel, cedar or tile roofs

M-5200 Series
